

Ripple Effect

Syncear Loyd

Brings the cool breeze on the summer days

Provide energy in multiple ways

But when the ocean consequently becomes the end of us,
what will we really have to say?

The effects of this massacre are sad and unjustified

But I must be blunt and Syncear

The effects of time allow actions to sound ordinary

But life is continuing to disappear

Oceans have been endless amounts of joy, also can bring a
lot of pain

But maybe that's consequential

Our economic performances can bring extinction

Which would be monumental

But also tell me, who sent the death penalty on these
animals?

When it comes to the earth, we say we take pride
But don't think the ocean is doing it to itself
Mother nature committing suicide?

Aquatic discrimination

In God we trust but kill for no reason or right
Animals in water, now who's standing for their rights?

Most of the time it's for economic growth
Ending animal's life sounding like hypocritical oath
Looking at the lives, as useless
But when was killing permitted in the constitution

Most of my brothers locked up for murder
But white man companies taking lives like a fuel gauge
burner
Ending a life when it wasn't your life to take
You might seem real and beneficial but your morals are fake

I seek hope in the human race

It's never too late to try and make change

Like Benjamin Franklin said and then maybe this will cease
slaughter,

“When the well is dry, we will know the worth of water”.
