

Make a Difference

Syncear Loyd

One drop from the sky, no matter you or I

Makes a difference

Ripple effect, cannot predict what comes next yet

Makes a difference

From pocket change to million-dollar names

Makes a difference

Choose your side, justice for riversides to ocean tides

Makes a difference

I don't have your perception, can't imagine stepping in your shoes

Can't see what's on the line, not willing to lose

Last thing on your mind is preserving the ocean, the earth

Fighting battles so hopefully you feel less hurt

I know, you seem to be dealt a bad hand

But you have a good heart, I know this and understand

You are more than your worst days,

don't push pause on your future, push play

pressure from your circumstances, but I just want to say

I love you

I don't care what pain you might've caused in the past

Project positive perspective for life

Fight for love, don't bite the hand that eats you

When you accept this, share the love for the ocean that we do

Set up the stories so your grandkids can reminisce

Kites flying in the wind, sandy beaches and teaching how to make a
difference

Or even just a safe world to live in, no medical conditions due to
atmosphere filling

Carbon monoxides, watching the time fly by

But no matter your story, past, situation, or mindset

With one voice you can change, offset

Giving more opportunities to see more sunsets

Make a difference
