

Beauty of nature

Jenovic Luzolo

Ooh beautiful, powerful, is the ocean!
The color of ocean lights up the world.
The sound of it brings Peaceful and thoughtful times.
The power of nature it also is found in the ocean.
We have beautiful creatures in the oceans,
Such as fishes, shellfish, cephalopods, crustaceans,
Seabirds, sea turtles, dolphins, and a lot more!
Oceans help us in our daily lives, without oceans,
We cannot be in peace,
If we cannot value, the importance of oceans.
We are ignoring the part of our lives,
Ocean produced fresh air we breathe.
Oceans connect us from one to the other.
If we cannot take care of the diamonds and could,
We have for free. Then who will?
When we still seeing the beauty of
Oceans we should thank the past generations,
They kept it safe for us! They value the importance,
And the beauty of it that's why they carry it.

The ocean creature is crying,

We are ignoring the sounds of cries; we are killing them.

We cannot see their tears because there are in the water.

Humanity just does not want to pay attention to it.

I am ocean, I am oxygen, I am climate and weather.

I am life!

No one protects me and recruit it.

I am a big part of your life!
